AUTO RUBBER PARTS

Profile

In the year 1988, Mardan Group started its manufacturing of Auto Rubber Components. One of the earliest manufacturers, Morpar is today widely accepted all over the country. The giant presence in the market is the result of hard work, not only of the team within the organization but also the people associated with the Group.

In this journey we feel our association with Telco, Ashok Leyland, Punjab Tractors Ltd., Escorts Ltd., & Tractors India Limited has been a strong presence. A considerable technical support has been always there from Central Institute Of Road Transport, Pune, which is a leading testing house for automobile components.

Formal training at AOTS (Association of Overseas Technical Scholarship) Japan, enlightened our view for how an organization can work as a team in a unidirectional manner towards achieving highest levels of customer delight. Visits to manufacturing units in Italy, U.K. and Canada has helped us in broadening our view. As a result we have been able to produce better quality and a cost effective product.

Plant & Machinery

The Plant is complete and adequate to manufacture the entire range of product as per customer specification.

Well controlled extrusion line - hot and cold, help in maintaining accuracy and consistency in the section of Hoses and all kinds of Beadings / Profiles.

Mixing department is well equipped with Kneaders & open mixing mill with adequate amount of controls required to provide constant temperature and pressure requirement.

Different types of moulding techniques are adapted depending upon customers requirement & use of the product.

Designing and developing of the moulds is done with accuracy on State of the art machine.

Finishing is carried out on SPM's, Automat to ensure accuracy of the final product.

Quality Policy

Morpar has been one of the Earliest Rubber Manufacturing Unit to Obtain ISO 9000 Certification. It has now been certified for TS 16949, which is suppose to be highest quality standards for automobile ancillaries. Morpar also has self certification status with its major customers.

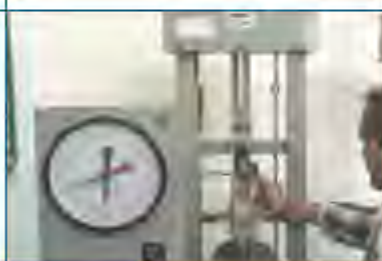

Research and Development

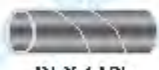

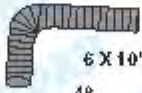

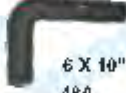

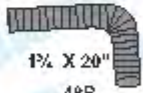

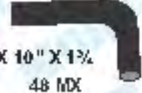

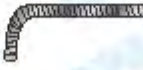

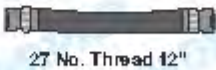

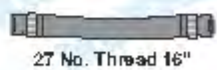

Our research and development is evident as we have utilized all opportunities of manufacturing more new products than any other rubber products manufacturing company in our country. We have had the privilege of working on new polymers and elastomers with help of our R&D team.

Business Policy

We strive to achieve highest standards of customer satisfaction by providing the right product at the right price, a motto always observed and believe by us at Morpar.

Today, environment being a global concern, all our policies & methods are eco-friendly.

Products Range

Engine Mounting

Rubber to metal bonded components has been our strength. All types of engine mounts, anti vibration mounts and hydro mounts manufactured can withstand dynamic stress testing, compression, deflection & bonding strength as per customer satisfaction.

Engine Mounting

Moulded Rubber Component

Our range of moulded rubber components consists of all types of rubber bushes, propeller shaft rubber, suspension parts, bellows etc. Recommended polymers are used as per specifications.

Moulded Rubber Component

Radiator Hose

One of the very few manufacturers of rubber hoses, our method of making hose is immensely vast having all possible types of finish such as fabric reinforced, braided, knitted, plain and wrapped so they can withstand required pressure.

Radiator Hose

Brake Diaphragms / Air Brake Hoses

Diaphragms manufactured in our plants has been tested for 1 million cycles in U.K., passing endurance tests as per International standard.

Testing of rubber Hose is a part of quality procedure before they are converted into brake Hose assemblies.

Air Brake Diaphragm

Oil Seals

Use of specified thickness of sheet metal for the outer shell, recommended oil resistant rubber, and moulds made on the most modern machine, we are sure of maintaining tolerance of the product, ensuring trouble free fitment & durability of the product.

Oil Seals

Fan Belts

Graded polychloroprene impregnated fabric, high tensile polyester chord for construction supported by recommended polymers cushion, ensures all endurance tests, giving higher drive efficiency with minimum slippage.

Automotive Belts
Autoreifen belüften Metallbelt

for its commitment to deliver the best product at the right price.

O.E. Suppliers to the Leading Chassis Manufacturers
Member : Association of State Transport Undertakings,
Defence, Railways & Leading Govt. Recgd. Export Houses

VISION

In present situation we look back just to gear up with greater thrust. In the organization, the competition is seen as a challenge, the tough customer as a teacher and globalization as an opportunity. The goal is to become leaders in our product field keeping in mind the judicious use of man and machinery.
